EDUCATION

M.S. in Computer Science and Engineering,
National Sun Yat-sen University,
2023/09 - 2025/07

B.S. in Computer Science,
National Taipei University of Education,
2019/09 - 2023/06

PROFESSIONAL SKILLS

Programming Language:
C++, Java, Python

Development framework:
Scrum, Agile

Frontend:
Vue, HTML, CSS, JavaScript

Backend:
ASP.NET, PHP, MySQL

Mobile Development:
Android Studio, Swift

Version Control:
Git, Kubernetes

Monitoring:
ELK, Grafana

MEMBERSHIP

Member,
Database Systems Lab

- Research Area: **Data Mining**
- ICEIB Oral Presentation
- **Teaching assistant** of Database Systems courses

Tournament Director,
Volleyball Torch Championship

President,
Student Association

General Coordinator,
Student Orientation Camp

HIGHLIGHTS

Collaborative software engineer with a growing interest in AI. On-call experience has sharpened my resilience under pressure, and I've led system development that measurably improved information transparency and operational efficiency.

#Teamwork #Scrum #Collaboration #Resilience #AIApplications
WORK EXPERIENCE

Product Developer Jul 2026 - Sep 2026
Titansoft

- Integrated a third-party payment gateway using ASP.NET, leveraging Claude Code to accelerate development and testing, and used the ELK stack for troubleshooting and monitoring during on-call shifts.

PROJECTS

Volleyball Torch Championship Website:

LLM, LINE BOT, HTML, CSS, JavaScript

- Built a lightweight volleyball info system with Google Sheets and AI, synchronizing scores, schedules, and referee assignments to improve player visibility. Created a LINE BOT AI assistant to handle schedule queries, reducing **30%** manual workload.

Course Reservation System:

PHP, MySQL, HTML, CSS

- Using PHP combined with MySQL, **50** students can make online reservation for demo and quiz sessions, improving teaching management efficiency.

RESEARCH

Master's Thesis: *An Efficient Period-LS-List Approach to Mine Top-k High On-shelf Utility Itemsets in the Incremental Database with Time Period*

- Applied Period-LS-List with pruning strategy to mine high utility itemsets, improving processing time by up to **46%**.

Volleyball Tactics Tracking System | **Second place** in Exhibition.

- Using OpenCV to recognize the tactics of players in volleyball match videos and convert the players into a 2D top-down view, helping beginners understand the game tactics.

COLLABORATION

2025-High School Research Essay **Technical Mentor** - *Implementing Dijkstra's Algorithm for Campus Navigation*

- Guided junior peers in applying **Python** and AI to collaboratively implement algorithms for campus navigation, enhancing efficiency for freshmen and visitors in locating classrooms.

The 117th Annual Congress of the Taiwan Society of

Otorhinolaryngology Head and Neck Surgery **Technical Partners**

- Assisted in developing Dual Platform Medical Conference APP
